Overview

Getting integrated in a new society can be a very long process if the receiving country does not have a good structure to meet the needs of the newly arrived.

Many immigrants, for different reasons, find it difficult to integrate in the labour market and/or in the society and the current refugee situation makes that challenge even bigger.

Sustainable structures in different integration actions (as education and training) have to be set up in order to identify and reduce the barriers for participation.

This can be possible through the structuring of informal channels that can lead newly arrived people to learn more about the local labour market and the local business environment.

The project involving 5 partners from 3 countries (Sweden, Italy and Germany) is focused on providing the informal educators new skills and competences to develop more effective ways, engaging both the migrants and the local business community.

An easier and more accessible learning process is supposed to lead to a faster inclusion in the local economic context.

Objectives

The main objective of the project is to develop innovative strategies to involve the business community in the inclusion of migrants in local society.

In particular, the specific objectives are:

- 1 To create networks between migrants and businesses;
- 2 To increase the recruitment base for local companies;
- 3 To increase knowledge and awareness about the dynamics of the local business environment and labour market.
