Sustainable food systems

Merja Willman
Norrköpings kommun

Cooperation and common challenges

AGENDA 2030 AND THE SUSTAINABLE DEVELOPMENT GOALS

Public meals –
Guideline for
Norrköping
Municipality's food
system

Food strategy
national – regional
– local

Preparedness/
crisis preparation

Regional food strategy

Public
procurement

"Sweden's best public meals are being served in Östergötland , made by Swedish and locally produced supplies."

- year 2025 more than 80 % of the food that is procured is produced in Sweden
- Year 2025 more than 50 % of the food that is procured is locally produced

Security

"Assured production capacity and robust production systems for reduced vulnerability"

Competitiveness

"Economic locomotive"

Costumer and
consumer

"Increase awearness about Swedish added value"

Decisions and governance

- Norrköping Municipality took part in the work of producing the regional food strategy
- The Municipal Executive Board decided in 2017 to adopt the regional food strategy
- A local action plan on how to work with the food strategy in Norrköping Municipality was adopted by the City Council in 2022

The food strategy national – regional - local

- The degree of self-reliance in Sweden must increase, today 45 %
- Increase the part of local food and Swedish groceries
- Develop the way of personal treatment during supervising businesses – make it easier
- Vocational education within green industry

Public meals - Guideline for Norrköping Municipality's food system

Public meals – Sweden and Finland (financed through taxes)

25 000 portions is served daily in Norrköping Municipality, within kindergarten, school and care

Consideration taken to Swedish environmental and animal protection rules

The guideline aims to, through public meals

- Encourage health and good eating habits

Common challenges

- Increase the amount of locally produced goods within public meals, also according to seasons
- Scarce commodity locally: vegetables
- Country-of-origin labelling
- Law on public procurement
- The municipality is an attractive customer for producers and wholesalers, bid on public contracts

Co-ordination, challenges and responsibility

Co-ordination between different actors:

- Dependent on import lowers the possibility for self-reliance, e.g. fuel, mineral fertilizer, seeds, plant protection and concentrate
- Provision preparedness
 - Electricity provision, back-up for kitchen
 - Placement of kitchen for preparing the food, lower the risk of decline in production by heavy rain
 - Warehouse for groceries
- Climate adaptation within farming
 - Flood or drought
 - Water scarcity
 - Large scale cultivation of new crops – research
- Food production creates jobs and growth, a living countryside
