The LGDs are built on engaging and formalising new working relationships with these groups.

They are tailored to each context and specificities, built on the commitment of local actors, and are guided by the principles of inclusivity, accountability, transparency and equity.

BUILD ON WHAT IS ALREADY THERE

Bring policies, strategies, and initiatives in place to support sustainable development together in a coherent way

AN INTEGRATED APPROACH

Horizontal coordination in governance will be required, as many cross-cutting sustainability issues need to be addressed with, or require the cooperation of, different departments in a Municipality.

A COLLABORATIVE APPROACH

LGDs will require cooperation with local stakeholders.

The local authorities can bring together local service providers from different sectors to provide cross-cutting solutions to meet local needs.
